14–17 September 1987, University College, Cardiff

AUTHORS		ARTICLES
D Bullett	205	Introduction
	207	Biographical notes
M M El Gomati and J A D Matthew	209	Scanning low energy electron loss microscopy (SLEELM): metals on semiconductors
R G Jones and Nagindar K Singh	213	CF_3I adsorption on Ni{100}
S P Tear and P G Cowell	219	Unconstrained optimization in LEED: application to Ge(111) (1×1)-H
H Lüth	223	Electron energy loss spectroscopy applied to semiconductor space charge layers
N Esser, U Resch, U Rettweiler, W Richter, D R T Zahn and R H Williams	229	Antimony on p-InP: characterization of band bending and overlayer growth by Raman spectroscopy
G P Srivastava	233	Electronic band structure of monolayer thin semiconductor superlattices
M Arnott, A Clarke, P J Rous, G Jennings and R F Willis	237	Structural relaxations in epitaxial films of fcc Fe and fcc Co on Cu(001)—a comparative LEED study
D R Warburton, P L Wincott, G Thornton, D Norman, C H Richardson, F M Quinn and R McGrath	241	Face and coverage-dependent sulphur coordination on the (110) and (111) faces of Ni using polarization-dependent SEXAFS and NEXAFS
O P van Pruissen, O L J Gijzeman and J W Geus	247	Adsorption and reaction of oxygen on Cu(110) in O_2/H_2 and O_2/CO gas mixtures
R McGrath, R Cimino, W Braun, G Thornton and I T McGovern	251	A photoemission study of H_2O adsorption on a vicinal Si(100) surface
P T Andrews	257	Inverse photoemission
T S Padmore, G Thornton and H A Padmore	261	The surface electronic structure of Ag(001) and Ag(111) studied with multichannel detection angle-resolved photoemission
R G Jordan	267	Photoemission from the ordered and disordered (100) surface of Cu_3Au
R E Palmer, J L Wilkes and R F Willis	271	An electron energy loss spectroscopy study of O_2 and H_2 physisorbed on graphite
J Heidberg, D Hoge, K Stahmer, H Stein, M Venschott, M Warskulat and H Weiss	275	Vibrational infrared spectra of adsorbates on ionic single crystal surfaces: CO_2 on NaCl(100)
N V Richardson	279	Atomic beam scattering
D M Rohlfing, J Ellis, B J Hinch, W Allison and R F Willis	287	Helium diffraction from $(2\times n)$ structures on Si(001)
M J Ashwin and D P Woodruff	291	Elastic scattering and charge exchange in He^+ ion scattering from alkali metal overlayers

C T Rettner	295	Scattering of NO from Ag(111): a model system for probing gas–surface inelastic collision dynamics
A K Sleigh, C J Adkins and W A Phillips	301	Study of adsorbed molecular species by inelastic electron tunnelling spectroscopy
D P Woodruff, A L D Kilcoyne, C F McConville, Th Lindner, J Somers, M Surman and A M Bradshaw	305	Photoelectron diffraction from oxygen-containing species on Cu(100)
R W Joyner	309	The role of surface science studies in elucidating the mechanism of the Fischer–Tropsch hydrocarbon synthesis
M E Bridge and J Somers	317	The adsorption of methylamine on Pt(111)
J W Niemantsverdriet, P Dolle, K Markert and K Wandelt	321	Miscibility between monolayer gold and silver layers
S A Walters and R H Williams	325	The interaction of Ag with the clean and oxidized n-type GaSb(110) surfaces
C Stephens, G J Hughes, I T McGovern, A B McLean, D R T Zahn, R H Williams, W Braun, R Cimino, W Wilke, H Haak and K Horn	329	Thermal effects in aluminium–semiconductor interface formation
M Bowker, G Lamble, D A King and B Wolfindale	333	K–Cl interactions on Ag(100)
M M El Gomati	337	The use of peak to background ratios (*P/B*) in AES and SAM: Have you ever wished you were better informed?
S Adamson, C O'Carroll and J F McGilp	341	The spatial distribution of flux produced by single capillary gas dosers
S Cartwright and N V Richardson	345	Thermal He scattering from an adsorbate
J Ellis, D M Rohlfing, B J Hinch, W Allison and R F Willis	347	A new method for the calculation of helium diffraction intensities from complex surfaces
E T Jensen, R E Palmer, R F Willis, I R Collins and P T Andrews	353	Initial state effects in the inverse photoemission spectrum of CO/Pd(111)
A W Robinson, B E Hayden and P M Tucker	357	Evidence for molecular reorientation of CO from RAIRS intensity measurements
J A D Matthew and S J Porter	361	Inelastic exchange scattering at surfaces
D A Evans, A B McLean and R H Williams	365	Sodium overlayers on n-type and p-type InP(110) surfaces
N M Forsyth, I M Dharmadasa, Z Sobiesierski and R H Williams	369	An investigation of metal contacts to II–VI compounds: CdTe and CdS
K M Brunson, D Sands, J G Simmons and C B Thomas	373	Changes in the SIPOS/Si interface induced by annealing at 900°C
K M Brunson, D Sands, M H Tayarani-Najaran and C B Thomas	377	The effect of interface states, at mid-gap, in p-silicon/SiO_2 junctions
S J Morgan, A R Law and R H Williams	381	A soft X-ray photoemission study of the epitaxial CaF_2/Si(111) interface
D W Bullett and W G Dawson	385	Electronic structure of carbidic and graphitic carbon adlayers on transition metals
D W Bullett and W G Dawson	389	Quantum chemical studies of formate on copper surfaces
A D van Langeveld, J P F M van Hertrooy, J B W P Loos and J W Niemantsverdriet	393	Characterization of carbonaceous overlayers on platinum by catalytic oxidation
A F Carley and M W Roberts	397	The chemical reactivity of oxidized lead surfaces studied by XPS: the mechanism of 'halogen-induced' surface etching
G Thornton, I W Owen, C H Richardson, D Norman, R A Tuck, H B Skinner, P J Wadsworth and T M Gardiner	401	A surface EXAFS study of the local coordination of barium atoms at the active-sites of thermionic cathodes

N B Brookes, F M Quinn and G Thornton	405	H_2O dissociation by $SrTiO_3(100)$ catalytic step sites
A P Brown, K O Jensen and A B Walker	409	Positron states on perfect and defected aluminium surfaces
R G Copperthwaite, P M Loggenberg, T E Derry and J P F Sellschop	413	Surface studies of Fischer–Tropsch catalysts using a high pressure reactor and sample transfer system
W S Brooks, T E Derry, J P F Sellschop, R G Copperthwaite, L Kusztelan and A G K Lutsch	417	Failure of zirconium silicide contacts during the silicidation process studied by AES and RBS

EXTENDED ABSTRACTS

D J Holmes, D R Batchelor and D A King	421	Surface structure determination by SEXAFS: the reliability of bond lengths and coordination numbers from multishell analyses
P J Dobson, B A Joyce, J H Neave and J Zhang	422	RHEED studies of semiconductor growth by MBE
R McGrath, I T McGovern, G Thornton, D R Warburton, D Norman and R Cimino	424	Determining the bulk-absorption component in ion-desorption surface EXAFS spectra

ABSTRACTS

R J Madix	427	BRITISH VACUUM COUNCIL ANNUAL ADDRESS—1987 Reaction kinetics and dynamics at surfaces
R M Tromp	427	Scanning tunnelling microscopy
D Sands, K M Brunson and C B Thomas	427	The effect of hydrogenation on the interface of ZnS/p-Si heterojunctions
C J Humphreys	427	Electron microscopy of interfaces in semiconductors
G Materlik	427	Determination of interface structure using X-ray standing wave fields
D P Woodruff, D L Seymour, C F McConville, C E Riley, M D Crapper, N P Prince and R G Jones	428	A simple X-ray standing wave technique for surface structure determination—theory and an application
M A Chesters	428	Vibrational spectroscopy of adsorbates on surfaces
B E Hayden and D C Godfrey	428	Evidence for resonant energy transfer in direct inelastic scattering via an adsorbate mode
D Halstead and S Holloway	428	The diffraction and sticking of H_2 from metal surfaces
P A Cox, K Joyce, N A Lucas and M Surman	428	Off-specular enhancement of inelastic electron scattering from adsorbates: H_2O adsorbed on $Na_{0.7}WO_3(100)$
R G Forbes	429	On the position of the electrical reference surface
V M Dwyer and J A D Matthew	429	Extrinsic loss removal in AES/XPS
G P Derby, C E Bird, D J Holmes, K G Purcell and D A King	429	The W{100} displacive phase transition: anomaly between helium and electron diffraction
A D Laine and P T Andrews	429	Normal incidence inverse photoemission of W(001) and W(110)
I R Collins and P T Andrews	430	The unoccupied states of Ta(001) studied by inverse photoemission
D M Spink, J M Noras and C B Thomas	430	Sensitivity limitations of ellipsometry
J N Carter, V M Dwyer and B W Holland	430	Empirical tight binding cluster method for semiconductor surface structures
N V Rees and C C Matthai	430	Electronic structure of V–Si interfaces
C F McConville, D L Seymour, S Bao and D P Woodruff	430	Multiple oxidation states on Al(111)

P J Lawrence, S C Parker and P W Tasker	**431**	Determination of the surface structure of ceramic oxides using computer simulation
M A Morris, J MacAllister and S Affrossman	**431**	Secondary ion mass spectrometry as a possible tool in the study of molecular reactions at small metal particles

VACUUM, ELECTRON AND ION TECHNOLOGIES

Papers from the Fifth Bulgarian Summer School
6–10 October 1987, Varna, Bulgaria

AUTHORS		ARTICLES
D S Karpuzov and S S Todorov	**965**	Introduction
H Reuther, B Rauschenbach and E Richter	**967**	Ion implantation in metals—structure investigations and applications
M Braun	**973**	Ion bombardment as a tool to modify surface properties of different materials

T D Radjabov	979	Improvement of the corrosion properties of metals by ion implantation
B Rauschenbach, R Küchler, M Posselt and R Dietsch	987	Ion beam mixing in Al/Fe multilayered thin films
M Posselt and W Skorupa	991	Range and range profile calculations for MeV phosphorus implantation into silicon
H Budinov and D S Karpuzov	995	Computer simulated and channelling studies of damage distributions in phosphorus implanted silicon
I V Katardjiev, G Carter and M J Nobes	999	Simulation of erosion induced surface evolution in temporally and spatially dependent systems
R Mühle and G Götz	1005	Ion beam exposure of PMMA polymer resist
T B Borzenko, A F Vyatkin, N N Gonchakova, V I Zinenko, Yu I Koval and V A Kudryashov	1007	The effect of ion implantation on polymer mask resistance to ion beam etching
G Wöhl, M Matthes and A Weisheit	1011	Reactive ion etching of deep trenches in silicon with CF_2Cl_2 and O_2
D N Popov, Tz K Kotlarova, Tz D Uzunov and V N Gaydarova	1015	Oxygen incorporation in Al thin films during deposition by dc magnetron sputtering
D V Tzaneva, R G Stoyanchev and D D Dobrev	1019	Structural properties of coatings prepared by flash evaporation and magnetron sputtering of Cu–15% Sn and Cu–20% Sn alloys
G N Grigorov	1025	An optimization method for nonequiradial electrostatic deflection systems
B Stefanov, P Petrov and P Pirgov	1029	Electron beam evaporation and welding: plasma formation and liquid pool instabilities
S G Kasabov	1035	UHV apparatus for electron-stimulated desorption: experimental procedure and characteristics
A Balasiński, A Jakubowski and A Świt	1041	The influence of electron beam energy on defect density in MOS device quality oxides
V V Aristov, V V Kazmiruk, N G Ushakov, E B Yakimov and S I Zaitsev	1045	Scanning electron microscopy in submicron structure diagnostics

EXTENDED ABSTRACTS

I N Ivanov, D V Ledyankin, I F Urazgildin and V E Yurasova	1051	Correlation between secondary ion and ion–photon emissions
D Menzel	1051	Electronically stimulated desorption

ABSTRACTS

E Rimini	1053	Ion implantation and annealing
J E Greene	1053	Role of ion/surface interactions in nucleation kinetics and elemental incorporation probabilities during film growth from the vapour phase
J-E Sundgren	1053	Role of ion/surface interactions on film growth kinetics: applications to hard coatings
G Carter	1053	Studies of ion beam sputtering and deposition processes and their influence on surface topography
G Götz and R Mühle	1054	Ion microbeam technique
V T Cherepin	1054	Modern trends in secondary ion mass spectroscopy
J P Langeron	1054	Background in Auger electron spectroscopy
V M Koleshko and B S Evseev	1054	Electron–laser–ion technology for treatment of semiconductor structures
J E Kreindel	1055	Technological capabilities of plasma electron beam sources

AUTHORS		ARTICLES
INVITED REVIEW		
C S Pitcher	**1059**	A review of particle fuelling and recycling processes in magnetic fusion devices
REGULAR FEATURES		
M Nindi and D Stulik	**1071**	Cone formation and transformation on diamond microparticle contaminated silver surface: semidynamic studies
S-W Han, W Jitschin, P Röhl and G Grosse	**1079**	Performance of the bent beam ionization gauge in ultrahigh vacuum measurements
K Reichelt	**1083**	Nucleation and growth of thin films
P Kováč and G Carter	**1101**	An attempt to observe collisional mixing in the In–GaAs interface system
Shen Gong-Lie and Jin Xian-de	**1105**	Thermal desorption of hydrogen for the Zr/Al getter alloy
